PERSONAL PROFILE

Start as Proposal Engineer for 2 years, it makes me comfortable working with large of data. So I decided to shift my career to be a Data Scientist.

My first jump into this field is taking a course in Data Science. Now I've worked as Data Scientist for 1 and a half years, and get experience working with real data. It makes me always love to learn about Data Science and its related field with high curiosity and passionate.

EDUCATION

TRISAKTI UNIVERSITY

Petroleum Engineering

May 2010 - Oct 2014

GPA: 3.61 | 4.0

HOBBIES

- Hiking Mountain
- Reading Books/Articles
- Watching Movie
- Listening to Music

CHARACTERS

- 2 years experience in analytical skills as Proposal Engineer
- Enjoy working with others as a Team
- Problem-Solving Mindset
- Self-Developing Mindset
- Passionate in learning something new

COURSE & CERTIFICATION

- AIML at Letsupgrade, 2020
- Statistic for Data Science at Greatlearning, 2020
- Data Science for Industry at Codplex, 2020
- Data Science at Purwadhika - Coding School, 2019

WORK EXPERIENCES

DATA SCIENTIST

Tata Consultancy Services Indonesia | October 2022 - Present

- Understanding the business case of lead generation of Telco Industry
- Exploring variable for making classification model.
- Performing cleaning and feature engineering to the Data
- Exploring the Model to solve imbalanced classification problem.

DATA SCIENTIST

PT. ILMUONE DATA | August 2021 - October 2022

- Exploring and understanding an ideas for client needs, like improving their engagement, etc.
- Developing and deploying a small app for predicting retinal eye's vesselin order to help a doctor for their research by using computer vision method.
- Developing and deploying end to end a small app (Dashboard) for analyzing text using sentiment analysis and entity recognition model in cloud environment.
- Exploring the recommendation system by crawling the web and extracting the information from it, then find similarities between articles
- Maintaining the existing project from one biggest online marketplace client, then troubleshooting if any error occurs

DATA SCIENTIST

PT. ASURANSI SINARMAS | Sept 2019 - February 2021

- Developing an automation system that's used for increasing cost efficiency based on an insight from existing data.
- Maintaining & improving the accuracy of an automation system.
- Developing OCR optimization from offered Proposal, then it's used to evaluate the feasibility of the Proposal (based on company policy).
- Crawling data to find the occurrence liability (i.e. vehicle accident or natural disaster in news, blacklist person, measure the shortest distance of firefighters to risk location, etc.)
- Developing machine learning to predict News Classification, that meets with Insurance coverage.
- Developing OCR system for handwritten digit based on form claim, and improving the accuracy by using encoder method

PROJECT ENGINEER

PT. TRUBA JAYA ENGINEERING | June 2017 - March 2019

- Make a progress from Subcont Work and also review the Subcont's report.
- Clarifying the scope of work, technical issue, engineering docs with Subcont.

PROPOSAL ENGINEER

PT. TRUBA JAYA ENGINEERING | June 2015 - June 2017

- Make an estimation and calculation for mechanical projects.
- Preparing all the required bidding docs for Mechanical project.

SKILLS HIGHLIGHT

PROFESSIONAL

- Python Programming
- Data Analytics Library
- Database (Sql-NoSql)
- Matplotlib, Dash-Plotly, Tableau
- Web Crawling Library
- Machine Learning, Deep Learning Library
- Cloud Platform
- MS Office
